

Welcome to Windsong Nursery Daylily catalog.

We are a newly created state inspected licensed Nursery in Southern Indiana. We have been producing product for 2 years with exceptional results according to our customers. Previously my wife and I have been gardening for 40 yrs growing everything under the sun.

A Windsong Nursery sells gorgeous high end daylilies with hybridizing of 1000's of varieties. Our future Daylilies releases will be unique. We are experimenting to produce products that bloom more often, with more blooms boasting spectacular colors and frills that have a wide variety of kaleidoscope color combinations. We will be producing some 20 to 30,000 daylilies in 20,000 square feet of greenhouses and shade areas. We are also specializing in many other products including Perennials, Irises, Hostas, flowering ornamental shrubs and trees, fruit & nut trees and Christmas trees (namely Colorado spruce and Frazier fur). **Payment & Shipping details are in the back of the catalog.**
